- More than 1,540 hours of educational videos, lectures, and documentaries from top producers
- Create Your Own Video Intro feature
- "Featured This Month" Calendar
- Custom Content Upload Option
- Captions, interactive transcripts, citations, Google Translate, and more
- New videos added at no additional cost
- Easily embed videos into Canvas, Blackboard, Moodle, or other CMS
- Tablet, mobile, PC & Mac friendly
- Create and share personalized playlists using segments from multiple videos
- Keyword tags for all content, linking to related material

Use the powerful search and browse tools to find the perfect titles and clips for lectures and assignments.

Once you find the clips you need, use the Add to Playlist tool or the embed code to provide instant access for students through your online course management system.

MASTER CAREER & TECHNICAL EDUCATION STREAMING VIDEO COLLECTION

Careers & Job Search Collection

Technology isn't just changing how work gets done across various industries—it's also changing the process of searching for and getting a job in the first place. Online portfolios, social networking, webcam interviews—these new realities are not simply replacing traditional ones such as résumés, cover letters, and a firm handshake; this technology has become an additional aspect of the modern job search to be mastered. This collection covers all the bases, from the tried and true to the cutting edge, while also providing overviews of career fields across the spectrum and insights into the necessary skills for success on the job.

Technical & Trade Education Collection

How does a hybrid car engine work compared to a gas engine? How do construction blueprints differ from electrical blueprints? What's the best way to connect IT networks that use different protocols? The hundreds of titles in this collection will help prepare students interested in vocational trades, including construction, cosmetology, communication, agriculture, applied engineering, and more.

Guidance & Counseling Collection

From teaching the "soft skills," such as time management and mitigating stress, that can boost academic success, to warning about alcohol and drugs, peer pressure, and other dangers inherent to becoming a young adult, this collection covers life lessons that aren't always taught in class, but that can be just as important in preparing for life after graduation.

Family & Consumer Sciences Collection

First aid, nutrition and diet, child care, kitchen and food safety, financial health, safe driving, fashion and interiors, independent living—the broad foundations of this collection provide just a hint at the hundreds of multifaceted titles it contains. From raising confident children and building psychological resilience, to understanding a 401(k) and confronting the dangers of texting and driving, this collection covers a wealth of life lessons.
