DIGITAL EDUCATIONAL VIDEO

BIOLOGY STREAMING VIDEO COLLECTION

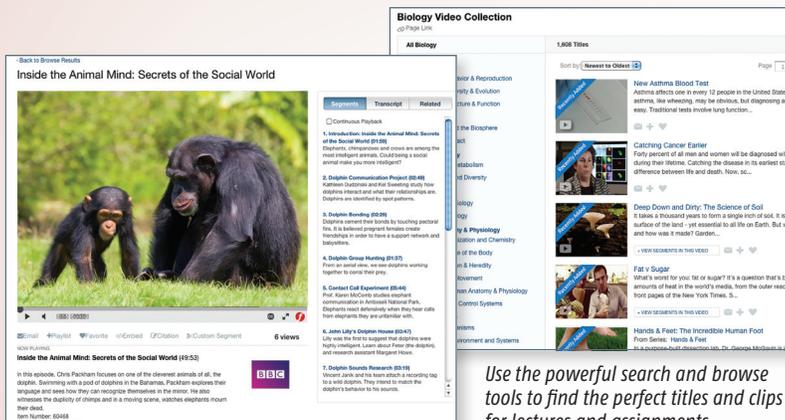

- INCLUDES:**
- Animal Biology
 - Ecology
 - General Biology
 - Human Anatomy & Physiology
 - Marine Biology
 - Microbiology
 - Plant Biology

18,300 VIDEO CLIPS
1,600 FULL-LENGTH VIDEOS AND GROWING!

From the fundamentals of cell division to the complexities of epigenetics, the vast field of biology is covered by this extensive collection of documentaries, educational videos, presentations, and interviews. Cells, genetics, and evolution. Human anatomy and physiology. Ecological diversity and change. All are brought to life for students in ways that only video can accomplish.

- Conveniently segmented for lecture and in-class use
- Unlimited access from any location—on campus or off
- More than 880 hours of educational videos, lectures, and documentaries from top producers
- Captions, interactive transcripts, citations, Google Translate, and more
- New videos added at no additional cost
- Easily embed videos into Blackboard, Moodle, or other CMS
- Tablet- and mobile-friendly

Use the powerful search and browse tools to find the perfect titles and clips for lectures and assignments.

Once you find the clips you need, use the custom playlist tool or embed code to provide instant access for students through your online course management system.

BIOLOGY STREAMING VIDEO COLLECTION

All titles are segmented into short, pedagogical clips, ideal for intermittent use during classroom lectures. For homework viewing, students can choose to watch an entire film without interruption. Titles within the collection are sorted across 23 distinct, browsable subject categories (e.g., The Brain & Control Systems, Evolution & Diversity, Cells & Metabolism, The Microbial World), enabling refined searched for available titles in specific topic areas.

Here's a sampling of the collection highlights:

EXCLUSIVE

The Human Body: How It Works

Comprehensive nine-part series that details the

inner and outer workings of the human machine.

EXCLUSIVE

Cell Biology:

Structure, Function and Processes

No-nonsense four-part series that guides viewers through the essentials of cell biology: structure and function, metabolism and respiration, and division and growth, with a focus on stem cells, cellular differentiation, and genetics.

EXCLUSIVE

Charles Darwin and the Tree of Life

An eye-catching BBC special, hosted by David Attenborough, that travels the globe to show how Charles Darwin developed his theory of evolution, and explore its ramifications today.

EXCLUSIVE

The Secret Life of Twins: Identity, Genetics, and Human Development

BBC series that investigates the nature-nurture debate and how twin studies are creating new avenues of research in medicine, genetics, and psychology.

EXCLUSIVE

Anatomy for Beginners

A four-part series in which the anatomist responsible for the world-renowned Body Worlds exhibit takes viewers on an anatomical tour that, despite the series' name, will enlighten students from Biology 101 to the most advanced medical courses.

EXCLUSIVE

The Gene Code

A series that documents many of the strides made in biology, anthropology, and health care as a result of the extraordinary genetic discoveries of the past few decades.

EXCLUSIVE

Biotechnology in the 21st Century

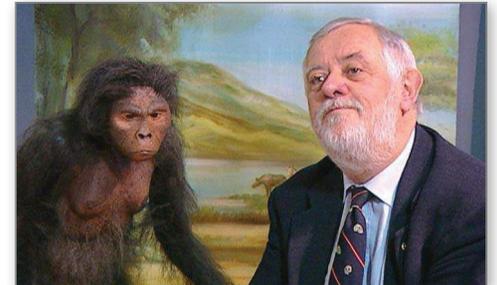

From major advances to practical applications to ethical controversies, this four-part series introduces viewers to a field of science that is rapidly changing the world.

EXCLUSIVE

Plant Biology:

Core Concepts Video Clip Library

Filled with award-winning animation, this comprehensive clip library brings to life the intricate biology of plants.

EXCLUSIVE

Cousin Bonobo

Fascinating documentary that investigates the genetics, biology, intelligence, sexual behavior, and matriarchal social organization of humankind's closest relative.

EXCLUSIVE

H5N1: Killer Flu

An Emmy-nominated and CINE Golden Eagle Award-winning Wide Angle documentary from Bill Moyers that investigates the deadly Avian influenza A.

EXCLUSIVE

Animated Neuroscience and the Action of Nicotine, Cocaine, and Marijuana in the Brain

CINE Golden Eagle Award-winning film that uses 3-D animation to take viewers on a journey deep into the brain to study the effects of these three substances.

EXCLUSIVE

Epigenetics:

The Hidden Life of Our Genes

Presents evidence that diet, stress, and environmental exposures can all modify gene expression.
