## EARTH SCIENCE STREAMING VIDEO COLLECTION

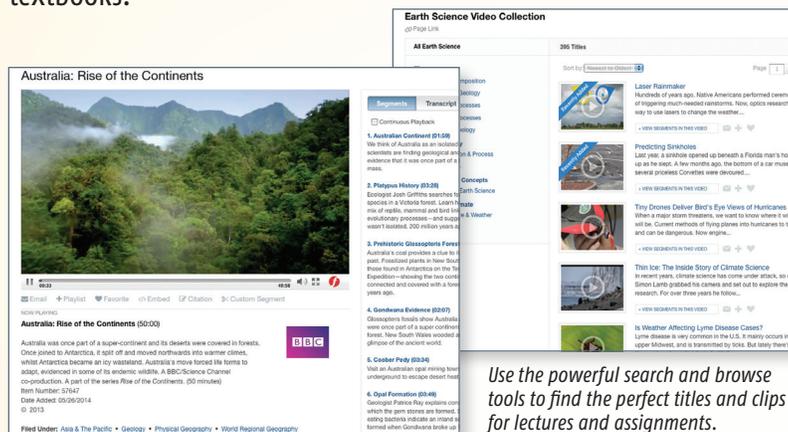

**INCLUDES:**  
**Geology**  
**Oceanography**  
**Survey / Basic Concepts**  
**Weather & Climate**

**4,500 VIDEO CLIPS**  
**400 FULL-LENGTH VIDEOS AND GROWING!**

Earthquakes and volcanoes, ice ages and global warming, rainforests and hydrothermal vents. The Earth is as complex as it is beautiful, and this collection is filled with documentaries and educational titles that serve to unravel the complexity while highlighting the beauty. The next best thing to fieldwork, these videos will add context to what is taught in lectures and bring life to what is learned from textbooks.

- Conveniently segmented for lecture and in-class use
- Unlimited access from any location—on campus or off
- More than 200 hours of educational videos, lectures, and documentaries from top producers
- Captions, interactive transcripts, citations, Google Translate, and more
- New videos added at no additional cost
- Easily embed videos into Blackboard, Moodle, or other CMS
- iPad, PC, Mac, and Android friendly

Use the powerful search and browse tools to find the perfect titles and clips for lectures and assignments.

Once you find the clips you need, use the custom playlist tool or embed code to provide instant access for students through your online course management system.

## EARTH SCIENCE STREAMING VIDEO COLLECTION

All titles are segmented into short, pedagogical clips, ideal for intermittent use during classroom lectures. For homework viewing, students can choose to watch an entire film without interruption. Titles within the collection are sorted across 22 distinct, browsable subject categories (e.g., Climate, Earth's Composition, Internal Processes, Historical Geology), enabling refined searches for available titles in specific topic areas.

**EXCLUSIVE**

### The Truth about Climate Change

A two-part series in which acclaimed naturalist Sir David Attenborough investigates climate change, how bad things might get, and what can be done to mitigate this potentially catastrophic trend.

### Rivers and Life: How Waterways Cradle and Confound Human Society

A six-hour series that guides viewers through cultures and countries shaped by rivers, including the Amazon, Ganges, Mississippi, Nile, Rhine, and Yangtze.

**EXCLUSIVE**

### The Life and Times of El Niño

This program follows El Niño's deadly path through human history and the progress science has made in understanding this once-mysterious phenomenon.

### The Once Good Earth: Understanding Soil

A program that takes viewers deep inside that unseen realm, focusing on the chemical and ecological complexity that enriches soil and sustains plant and animal life.

**NEW & EXCLUSIVE**

### Rise of the Continents

This four-part BBC series puts the giant jigsaw puzzle of Pangaea back together, uncovering the turbulent story of each continent and revealing why each one is so unique.

## Here's a sampling of the collection highlights:

### How the Earth Was Made

A mesmerizing 22-part series from A&E on the absolute beginning of Earth's history, with in-depth looks at famous locales, including Yellowstone, the San Andreas Fault, the Ring of Fire, Death Valley, the Atacama Desert, Loch Ness, Krakatoa, and more.

### How Earth Made Us: The Untold Story of History

A breathtaking five-hour BBC series that reveals the powerful influence of geology, geography, and climate on humanity's development, from the birth of agriculture to the industrial revolution and beyond.

**EXCLUSIVE**

### Biomes of the Earth: Core Concepts Video Clip Collection

A comprehensive library of 50 segments—breathtakingly filmed in locations around the world—that will open viewers' eyes as it covers key biological, environmental, and geological concepts associated with the ecological communities forming the biosphere. Ideal for intermittent classroom use.

More than 40 videos from the **American Museum of Natural History** on a wide range of topics, including acid oceans, the search for oil in ANWR, earthquake science, continental deformation, restoring mangrove ecosystems, and more.

**EXCLUSIVE**

### Cambridge Core Science Series: GeoBasics

An eight-part series, which made *Science Books & Films'* annual "Best Films" list, providing a well-rounded overview of the study of the Earth, its systems, and humankind's impact. Includes coverage of plate tectonics, rocks and minerals, oceans and seas, geocycles, energy and resources, and more.

**EXCLUSIVE**

### The Arctic Circle

Filmed in some of the Earth's most beautiful and desolate locations, a two-part series that marries hard science with dramatic live-action footage and sophisticated computer graphics to tell the story of climate change at the top of the world.

**NEW & EXCLUSIVE**

### Could We Survive an Atlantic Mega-Tsunami?

This BBC program brings the reality of an unparalleled Atlantic tsunami to life in an authentic way.
